

The problem with Love is: We only know how to love based on the way we have been loved or how we have loved - our own life experiences and our past life conditions.

IS THIS BASED ON FEELINGS OR EMOTIONS WE HAVE IN OUR OWN LIFE?

We only need to love what we do not like about ourselves 1% more than we have in the past to change our vibration.

Our Family is Our Past

*** Other Factors Include:**
CULTURE
NATIONALITY
RELIGION
MALE VS. FEMALE

Our Children And Their Feelings And Energy Patterns

Their friends, family, even the energy surrounding schools are all examples of the dynamic patterns that involve them

There are hundreds of vibrations around us in our energy field.

Past relations unresolved

We help give others a higher vibration. Anything in our energy field, other than creative flow, can get in the way.

If we are One, we are One with everything - All Energy Patterns

Q: Are we One or are we separate? Are we sending Love & Light? or is it our energy?

TEACHER

We send energy based on our ideas of Love

Q: Is this person a Creator or a Victim? When we send energy, do we intensify the creations of another?

Their Past

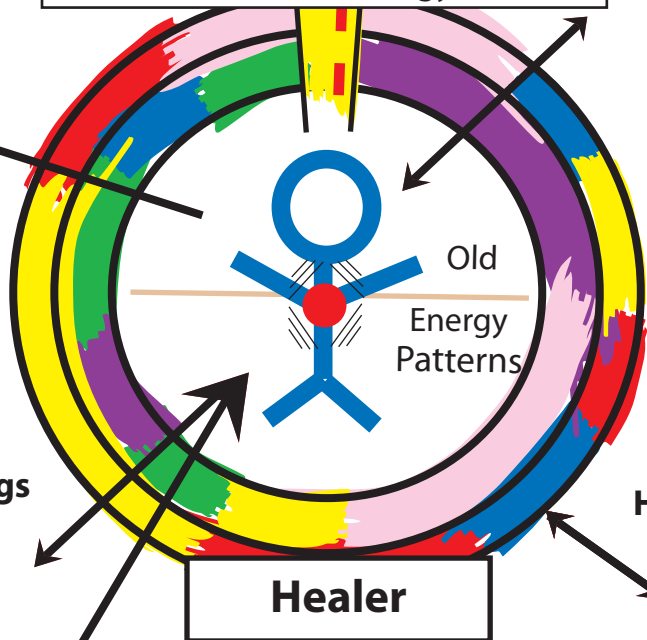

Remember- cancer is made up of different energies or past emotions.

Made up of old patterns - old energy

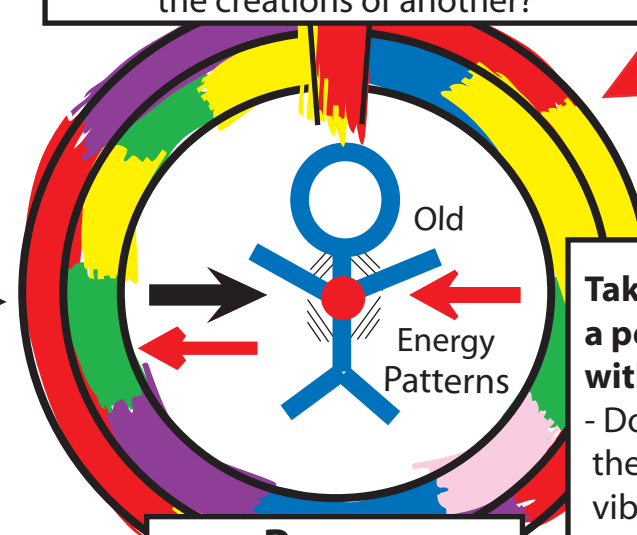

So, there is a vibration of cancer made by the feelings & emotions from the 5,000,000 people who have cancer

Is this collective consciousness attracted to its Creator or is it energy made up from history? - Almost all energy patterns come from the past

OTHER PEOPLE WHO HAVE EVER HAD CANCER

Healer

Person who is sick, hurt or not feeling good.

Take, for instance, a person diagnosed with cancer.
- Does this now give the cancer a life & vibration of its own?

HUSBAND & HIS FAMILY

All these people pulling on us - Keeping us from our Creative Flow

WE KNOW WE ARE MADE UP OF MANY DIFFERENT EMOTIONS - EACH IS A VIBRATION WE HAVE BEEN EXPOSED TO; SOME FOR DAYS WEEKS OR YEARS - SOME WE ARE BORN WITH.

OLD WORK

When we Heal; do we have to heal our past?

OLD FRIENDS

The sick person also has this kind of past.

Pulling on them

The person we are helping has the same old energy patterns. There are a lot of projections on their physical bodies.

They are made up of all vibrations - millions of emotions - which are all related to sickness, hurt & pain.

PROJECTIONS
These are energy patterns

THEIR FAMILY
Projecting more ideas, thoughts & energy onto them.

- A. Healer** - When we send energy by our thoughts, intentions, ideas (projections), does that affect our other relationships? Is there a form of transference based on what we have not yet looked at or are not yet aware of?
- B.** Do we intensify another persons creation (sickness/hurt/pain)?
- C.** Does a collective consciousness see us as merely more energy or does it see us as Creators?
- D. Afterwards** - Do we find ourselves feeling like we have just been run over by something or someone? It could even be days before we begin to feel better.
- E.** When we heal, do we heal our past? OR are we helping to heal the old energy of the collective consciousness?

Description for chart One:

We as healers (helpers of others) do not realize that our primary job is to 'heal' ourselves. We continue to energetically attract others who reflect the issues we most need to view and learn. Can we heal another when we have not healed ourselves? When we heal ourselves, maybe we have to heal this life and all past experiences forever to truly free ourselves from our past. In this chart, we are depicting one 'healer' who is helping another individual with cancer. We must be aware of all the distractions that both of the individuals have in their lives. Their families, their children, the people around them and their partner/spouse all create situations that would take the 'healer' out of their own creative flow of Higher Self. These become interferences of healing energy.

While we may intend to send love and light; in actuality, it is our energy we are sending – full of our own intentions, thoughts and ideas – all of which filter our connection to Higher Self. When we send energy, that energy actually intensifies our own dynamics. Is the other person a creator or a victim? Eventually, we will understand and come to the same conclusion: we are all creators. The other person is a creator, victimized by the emotions of their own creations.

Is it possible that when we send our thoughts, intentions or energy to another person, it could intensify their sickness or add even more chaos to what they have created? Is it also possible that the collective consciousness attached to them (in this case, cancer) – could be attracted to our energy as the 'healer/sender'? We are either creators learning from our own creations and experiences – One with all creation - or we are Separate. Those around us will most probably ask us to remain separate, and continue to reflect the same energy as in the past. Others around us will also most probably continue to act as victims energetically attached to past dynamics.
